

# 14-Point MOU Compliance Tracker

Last refreshed **30 Jun 2026**   60-day clock **Day 13 of 60 (ends ~16 Aug 2026)**   Next review **on request**

## STATE OF THE MOU

On Day 13 of 60, the framework is intact on paper but fraying at two seams. A weekend tanker-strike-and-retaliation cycle (25-28 Jun) — US strikes inside Iran, Iranian strikes on Bahrain and Kuwait, a Qatari national killed — keeps Article 1 in breach territory; both sides agreed on 28 Jun to "stand down for now," but Israel has warned war could resume within 48 hours and Hezbollah has rejected the US-brokered Lebanon disarmament deal. The negotiation track is now contested: Trump says US-Iran technical talks open in Doha today, focused on the Strait of Hormuz, while Tehran calls the talks "not confirmed" and analysts report they were "postponed indefinitely" — so Article 3 moves to At Risk / Contested. Hormuz (Art 5) is the core fight: Iran insists on managing the strait and held its first talks with Oman, while US-protected traffic via the Omani coast has recovered to ~half pre-war volume. Oil waivers (Art 10) remain the one clearly delivered item; frozen funds (Art 11) show a possible Qatar-channel opening but disputed end-use.

1

## Permanent ceasefire on all fronts, including Lebanon

Both sides declared an immediate and permanent end to military operations and committed not to use force against each other. As of 29 Jun this is the most damaged clause: a tanker-strike-and-retaliation cycle is running, with US strikes inside Iran and Iranian strikes on Gulf states.

**Breached / Violated**

**Ceasefire**

No fixed deadline — ongoing compliance

Breach stands; strikes paused since 28 Jun but ceasefire fragile

29 Jun

Israel's defense minister Katz warned the war could resume "within two days" if missiles are fired at Israel, even as the US pressed ahead with technical talks.

● [Fox News](#)

28 Jun

IRGC fired ballistic missiles and drones at US bases in Kuwait and Bahrain; a residential building in Muharraq was hit and a Qatari national on a vessel was killed by shrapnel. Kuwait intercepted two missiles.

● [CNN](#)

28 Jun

Trump warned Iran "will no longer exist" if strikes continue; Tehran warned any violation would mean "the complete halt of all diplomatic processes."

● [CNN](#)

28 Jun

A US official said Washington and Tehran agreed to "stand down for now," with vessels free to move through Hormuz, and to shift to emergency talks in Doha on Tuesday focused on the strait dispute.

● [The Hill / Axios](#)

27 Jun

After a drone hit the Panamanian-flagged tanker Kiku, US warplanes struck 10 Iranian military targets — the third such US strike in three weeks.

● [NPR / CENTCOM](#)

26 Jun

Rubio brokered an Israel-Lebanon agreement to jointly disarm Hezbollah and eventually normalize ties; Hezbollah and Iran rejected it, adding to US-Iran friction.

● [Soufan Center](#)

26 Jun

Israel-Lebanon framework signed in Washington after five rounds; Rubio called it a first step. Hezbollah rejected it and vowed to fight until Israel withdraws.

● [Gulf News](#)

25–26 Jun

IRGC drone struck the Singapore-flagged Ever Lovely in Hormuz; Trump called it a foolish ceasefire violation. IMO paused its vessel-evacuation operation.

● [Fox News](#)

17 Jun

MOU signed; ceasefire declared in effect. Trump signed at Versailles, Pezeshkian in Tehran.

● [Al Jazeera](#)

2

## Mutual respect for sovereignty / non-interference

A standard non-interference clause with no dedicated monitoring metric. No formal mechanism yet, but both sides have begun invoking sovereignty: Iran calls US coastal strikes a UN Charter and MOU breach; the US frames its strikes as ceasefire enforcement.

Not Yet Triggered

Sovereignty

No fixed deadline

Hard to verify; Gulf states open a regional security framework with Iran

29 Jun

Qatar's PM said Gulf states are working on a regional security framework with Iran, with hoped-for economic cooperation; Rubio toured Kuwait, Bahrain and the UAE affirming US commitment to Gulf security.

● [Soufan Center](#)

27 Jun

Iran's foreign ministry said US strikes on its southern coast violated the UN Charter and the memorandum.

● [Al Jazeera](#)

ongoing

Hardest article to verify independently. Watch proxy-activity claims (Hezbollah, Houthi) as an indirect signal.

● Tracker note

3

## Final deal within 60 days (extendable by mutual consent)

The master clock for the whole MOU. The Lake Lucerne round produced a roadmap and working groups; a US official says technical talks remain on track even after the latest strikes — though Iran has threatened to walk.

At Risk / Contested

Negotiations

Day 13 of 60 — due ~16 Aug 2026

Contested: Trump says Doha talks on for 30 Jun; Tehran says nothing confirmed

30 Jun

US and Iranian delegations were due to meet in Doha for technical talks centered on the Hormuz dispute; the outcome was still developing at publication.

● [NPR / CNBC](#)

29 Jun

Trump said "Iran has requested a meeting" that "will take place tomorrow in Doha," but Iran's deputy FM said reports of Doha technical talks were "not confirmed" — a public contradiction over whether talks are even on.

● [Al Jazeera](#)

29 Jun

The Soufan Center reported press accounts that further US-Iran talks on a permanent agreement had been "postponed indefinitely" after the weekend clashes.

● [Soufan Center](#)

- 29 Jun A senior US official said technical talks are "on track for the coming days" and deconfliction channels are running despite the weekend strikes.
- [CNN / Gulf News](#)
- 29 Jun Despite Iran's "complete halt" threat, mediators said negotiators are still expected in Qatar this week and a US official reaffirmed technical talks will continue.
- [PBS / CBS News](#)
- 29 Jun Iran's parliament — kept closed through the talks — was reported to be weighing the MOU this week, with hardliners pressing to reopen the chamber; no ratification vote had been recorded.
- [Iran International / CBS News](#) **UNVERIFIED**
- 28 Jun After the weekend escalation, the parties agreed to meet in Doha on Tuesday; the session was shifted to Qatar and reframed to focus on the Strait of Hormuz dispute.
- [Axios / RFE-RL](#)
- 22 Jun Atlantic Council's Warrick warned the technical phase may prove harder than the political deal and could run past the 60-day timeline.
- [Soufan / Atlantic Council](#)
- 21 Jun Lake Lucerne Summit (Bürgenstock, Switzerland), mediated by Qatar and Pakistan, agreed a roadmap to a final deal within 60 days after an 18-hour session.
- [Al Jazeera](#)

4

## US naval blockade lift / force withdrawal

Blockade removal began immediately and should fully end within 30 days. Withdrawal of US forces from Iran's proximity is tied to the final deal, not this MOU, so that clock has not started — and US strikes on Iran cut against the "remove disturbances" language.

| In Progress

Maritime

Full lift due ~17 Jul 2026

Blockade still lifted; force withdrawal not started; US strikes are enforcement

- 29 Jun Checked — CENTCOM's weekend strikes were framed as ceasefire enforcement, not a re-imposition of the blockade, which remains lifted; force-withdrawal clock still tied to the final deal.
- [Soufan Center](#)
- 26 Jun CENTCOM said US forces remain "present and vigilant throughout the region" though no longer blockading.
- [Fox News / CENTCOM](#)

18 Jun CENTCOM said it had ended its blockade of Iran's ports and coastal areas: "All U.S. military blockade enforcement efforts have ceased."

● [CENTCOM / CNBC](#)

watch Force-withdrawal clock is contingent on the Article 3 final deal. The 27 Jun US strikes weaken the odds of reaching that deal on schedule.

● Tracker note

## 5 Hormuz reopening, demining, toll-free passage (60 days only)

Iran must restore traffic to pre-war volume within 30 days, demining as it goes, with passage toll-free for 60 days. Traffic recovered briefly, then Iran re-declared closure (citing Lebanon) and now requires prior coordination; the US says Iran does not control the strait.

| At Risk / Contested

Maritime

Oil & Energy

Pre-war volume due ~17 Jul; toll-free window ends ~16 Aug

Contested control; Iran-Oman hold first Hormuz talks; transits ~half pre-war

29 Jun Iran and Oman held their first talks on Strait arrangements as the deal stayed on edge, while Tehran again declared the strait closed ahead of the Doha session.

● [Euronews](#)

28 Jun The clashing reading of Article 5 became the explicit agenda item: both sides agreed vessels can move freely "for now" and routed the Hormuz transit dispute to the Tuesday Doha session.

● [Outlook India / The Hill](#)

27 Jun The US Navy-overseen Joint Maritime Information Center widened the protected lane near Oman's coast for two-way traffic; Kpler put transits at ~120/day, more than half pre-war levels.

● [Soufan Center](#)

26 Jun A UN maritime agency began moving stranded vessels out via the alternative Omani coastal route, then paused after the tanker attacks without safety guarantees.

● [NPR](#)

25 Jun Iran's Persian Gulf Strait Authority warned on X that vessels using non-Iran-designated routes would lose safe-passage guarantees and insurance coverage.

● [Soufan Center](#)

22 Jun Ships kept moving despite Iran's closure claim, some using a route near the Omani coast not authorised by Tehran.

● [Al Jazeera](#)

20 Jun Iran said it closed the strait again over Israeli strikes in Lebanon; CENTCOM said 55 merchant ships transited that Saturday and disputed the closure.

● [NBC News](#)

ongoing Iran suspended tolls for 60 days but still requires ships to request permission through its newly created Persian Gulf Strait Authority before transiting.

● [NPR](#)

## 6 \$300B Iran reconstruction fund

The US is to work with regional partners on a plan of at least \$300B, enabled by sanctions relief rather than direct US money. Trump has publicly denied any US government fund; whether Gulf states finance it is unresolved.

| **Conditional**

**Reconstruction**

Mechanism due ~16 Aug 2026

Mechanism deferred; reconstruction to be privately/regionally funded, not US money

23 Jun Reporting indicated the ≥\$300B reconstruction fund would draw on private-sector and regional investment rather than US taxpayer money; fact-checkers scrutinized Trump's framing.

● [NPR / Politifact](#)

22 Jun Soufan Center: it remains unclear whether Gulf monarchies or other wealthy states will provide the money to finance the provision.

● [Soufan Center](#)

21 Jun Vance said any reconstruction fund would not include American taxpayer dollars and would instead come from investment by other countries.

● [Steptoe \(sanctions analysis\)](#)

## 7 Full sanctions removal (UNSC, IAEA, US primary + secondary)

The US commits to ending all sanctions categories on a schedule set in the final deal. A dedicated sanctions working group was created at Lucerne; the 60-day waiver (Article 10) is separate from full termination.

| **Conditional**

**Sanctions**

Schedule TBD in final deal (~16 Aug 2026)

Checked — schedule still deferred to the final deal; no new termination actions

22 Jun Soufan: relief talks will center on thousands of Iran-linked entities sanctioned over eight years of "maximum pressure" — a slow, technical process.

● [Soufan Center](#)

21 Jun

Lucerne negotiators created working groups on nuclear, sanctions, and monitoring/dispute-resolution to implement the MOU.

● [CNN](#)

## 8 Nuclear weapons commitment / HEU disposition

Iran reaffirms it will not develop nuclear weapons; the fate of its enriched stockpile is deferred, with on-site down-blending under IAEA supervision as the minimum method. Iran has agreed to readmit IAEA inspectors but insists on its right to enrich.

| **Conditional**

**Nuclear / IAEA**

HEU fate TBD in final deal

Checked — IAEA access agreed in principle but Iran says only after a final deal

24 Jun

IAEA chief Grossi gave his clearest signal yet that inspectors will reach Iran's enrichment sites, pushing back on conflicting US and Iranian framings; Iran's foreign ministry said sites struck last year are not on the inspection schedule.

● [Euronews / Times of Israel](#)

22 Jun

Soufan: removing or down-blending the uranium could require thousands of personnel and far longer than the 60-day window.

● [Soufan Center](#)

21 Jun

Vance said Iran agreed to invite IAEA inspectors back, with first contacts possibly within days — and that the strait and stockpile remain core issues.

● [Al Jazeera](#)

21 Jun

President Pezeshkian said Iran would not relinquish its right to enrich uranium while repeating its denial of seeking weapons.

● [Al Jazeera](#)

## 9 Status-quo freeze: Iran nuclear program / US force levels

Pending the final deal, Iran holds its nuclear program at status quo and the US adds no new sanctions or forces. The US strikes on Iranian military sites (27 Jun) test the spirit of the no-new-deployment commitment, though framed as enforcement, not buildup.

| **In Progress**

**Nuclear / IAEA**

**Ceasefire**

In effect until final deal (~16 Aug 2026)

Freeze strained; weekend US strikes and Israel's war warning test the status quo

29 Jun

Israel warned war could resume within ~48 hours; the US framed its weekend strikes on Iranian military sites as ceasefire enforcement, not new deployments under the freeze.

● [Fox News / Soufan Center](#)

27 Jun US strikes hit Iranian surveillance, communications, air-defense, drone-storage and minelayer capabilities — described as a ceasefire-enforcement response, not a new deployment.

● [NPR / CENTCOM](#)

watch Key clause for the enrichment question — Iran keeps its program live through the window. Watch IAEA statements for any change in enrichment levels.

● Tracker note

## 10 US Treasury waivers for Iranian oil exports

Immediately on signing, Treasury issues waivers for Iranian crude, products, derivatives and related services. This is the clearest implemented article: OFAC issued General License X on 22 June, authorizing Iranian oil sales through 21 August.

| **Confirmed**

**Oil & Energy**

**Sanctions**

Effective immediately from signing

Checked — General License X waiver remains in force through 21 Aug 2026

22 Jun OFAC issued Iran General License X, broadly authorizing the production, sale and shipping of Iranian oil — with USD payments — through 21 August 2026.

● [OFAC / U.S. Treasury](#)

watch Track the OFAC waiver text and Chinese teapot-refinery purchase volumes as the leading indicator of real, not nominal, relief.

● Tracker note

## 11 Frozen Iranian funds released

The US is to make frozen funds (≈\$100B) fully usable, with the Central Bank of Iran directing the beneficiary. Release procedures are unset and the end-use is openly contested — the US ties it to buying US crops; Iran rejects any US say.

| **At Risk / Contested**

**Frozen Assets**

**Sanctions**

Procedures TBD during 60-day window

Disputed end-use; US reportedly working with Qatar on an access channel

26 Jun Trump again said unfrozen Iranian assets would be used to buy American crops for the Iranian people.

● [Fox News](#)

23 Jun The Wall Street Journal reported the US is working with Qatar to give Iran access to billions in frozen funds — separate from the \$300B fund; end-use remains contested.

● [WSJ via NPR](#)

17 Jun ABC: relief could cover roughly \$100B in frozen assets, but is not immediate and hinges on Iranian compliance.

● [ABC News](#)

watch Iran's central bank has rejected any obligation to buy US goods, and officials want funds usable for military spending. End-use is the most contested implementation question.

● Tracker note

## 12 Implementation / monitoring mechanism established

A joint mechanism is to oversee implementation and future compliance. This has moved from undefined to forming: Lucerne created a High Level Committee and a monitoring/dispute-resolution group, plus a Doha coordination center and a Lebanon deconfliction cell.

| In Progress

Governance

Negotiations

No fixed deadline

Structure forming but tested; deconfliction cell active amid clashes

29 Jun Checked — the US-Iran deconfliction cell (IRGC + CENTCOM) kept meeting in Doha, but the weekend tit-for-tat strikes exposed the limits of the monitoring mechanism.

● [Soufan Center](#)

29 Jun Vance said the US-Iran deconfliction cell now has IRGC and CENTCOM representatives sitting together in Doha to manage incidents.

● [Times of Israel](#)

28 Jun Iran's speaker Qalibaf called for an urgent meeting of a newly formed conflict-control unit involving Iran and the US.

● [NPR](#)

21 Jun Mediators announced a High Level Committee for political oversight and working groups including a monitoring and dispute-resolution group.

● [Fox News](#)

### 13 Nuclear talks gated on Articles 1, 4, 5, 10, 11

Stage-2 talks are meant to begin only once the ceasefire, blockade lift, Hormuz measures, oil waivers and asset release are underway. The picture is mixed — 4 and 10 are implemented; 1 and 5 are deteriorating and 11 is disputed — yet the parties opened working groups anyway.

At Risk / Contested

Negotiations

Nuclear / IAEA

Triggers when Arts. 1/4/5/10/11 are underway

Gates wobbling: Art 1 in breach, Arts 3 & 5 contested

30 Jun Checked — gating conditions deteriorated: the ceasefire (Art 1) is in breach territory and Hormuz (Art 5) plus the talks themselves (Art 3) are contested, leaving Stage-2 footing weaker.

● Tracker note

21 Jun Despite imperfect implementation of the gating articles, the parties launched nuclear, sanctions and monitoring working groups at Lucerne.

● [Al Jazeera](#)

watch The single most important gate to monitor — Iran can stall Stage 2 by disputing implementation of any of the five referenced articles.

● Tracker note

### 14 Final deal endorsed by binding UNSC resolution

The final deal is to be endorsed by a binding UN Security Council resolution, making China and Russia structural guarantors. No endorsement resolution exists yet, since there is no final deal.

Conditional

Governance

Required for final deal (~16 Aug 2026)

Checked — no final deal, so no Article 14 endorsement resolution yet

16 Jun China's Wang Yi called for UNSC and multilateral structures to play a bigger role — read as signalling acceptance of a guarantor role.

● TASS

12 Mar UNSC Resolution 2817 (2026) condemned Iran's "egregious attacks" on Gulf neighbours, adopted 13–2 with China and Russia abstaining. It predates the MOU and is not the Article 14 final-deal endorsement, which does not yet exist.

● [UN Meetings Coverage \(SC/16315\)](#)
